

Automatic Locking lifeline hook

This new lifeline hook developed by Wichard offers many benefits. Thanks to the trigger integrated into the body, the lifeline hook can be single-hand operated and closes automatically. 2 versions are available for M6 and M8 lifelines. This new lifeline hook is forged in Duplex stainless steel grade and thus offers high mechanical resistance as well as corrosion resistance.

Benefits

- > Automatic locking lifeline hook
- > Only takes one hand to operate
- > Forged Duplex stainless steel body - composite injection trigger (PBT) - 316L stainless steel grade spring and piston
- > Compact and lightweight
- > For M6 and M8 lifelines
- > Registered design
